SUMMARY

I see software quality as more than just finding bugs—it's about building confidence in every click. As a passionate SQA Engineer, I specialize in both manual and automation testing, ensuring every feature works flawlessly before reaching users. I love breaking things in the best way possible—identifying vulnerabilities, fine-tuning processes, and helping teams understand the true impact of quality assurance. With a problem-solving mindset, an eye for detail, and a love for explaining complex QA concepts, I strive to create software that's not just functional, but exceptional. Let's make every release a success!
